IN THE CLAIMS:

Cancel Claim 8 without prejudice.

Please amend Claims 1 and 7 as follows:

1. (Amended) An electric equipment having a power saving mode comprising:

deriving means for deriving a remaining capacity of a battery,

selecting means for selecting one of a plurality of power saving modes,

calculating means for calculating a remaining operating time from data derived by said deriving means and a power saving mode selected by said selecting means, and

display means for displaying both the power saving mode selected by said selecting means and the remaining operating time calculated by said calculating means.

7. (Amended) A method of operating electric equipment, comprising the steps of:

generating a signal representative of a remaining capacity of a battery supplying power to the electric equipment,
